

BALANCED CARE FOR WOMEN OF ST LOUIS, PC
10806 Olive Boulevard
Creve Coeur, MO 63141
(314) 993-7009

LEEP INSTRUCTIONS

What to expect after a LEEP:

- You may develop a brownish discharge lasting several days.
- Slight bleeding may occur four to six days postoperatively. This delayed bleeding is normal.
- If bleeding persists more than six days or becomes heavy, you should call this office and come in to be seen.

Please follow these instructions after a LEEP:

- Take Anaprox-DS as given by your doctor or three Aleve (over-the-counter) every 4-6 hours for pain.
- Use Cleocin vaginal gel starting five days after the procedure for five consecutive days to prevent infection.
- No intercourse for two weeks.
- Use pads, not tampons.
- Please come in for a repeat pap smear in three months.
